EDUCATION

UG Degree
B.Tech in Artificial Intelligence and Data Science
Bannari Amman Institute of Technology
CGPA — 7.64

Komarasamy Gounder Matric Higher Secondary School
2021–2022 | HSC — 78.67%
2019–2020 | SSLC — 73.8%

CORE SKILLS

Data Structures & Algorithms
Computer Networks
Object-Oriented Programming

TECHNICAL SKILLS

Programming Languages
Python, SQL, C (Intermediate)

Web Development
HTML, CSS, Flask

Machine Learning & AI
Scikit-learn, TensorFlow, NumPy, Pandas

Computer Vision
OpenCV, MediaPipe, dlib

Tools & Platform
Visual Studio Code, Power BI, Figma, Git, GitHub, Hugging Face, Google Colab

ACHIEVEMENTS

- Completed 24-hour hackathon at Coimbatore Institute of Technology

LANGUAGES KNOWN

English — Read, Write, Speak
Tamil — Read, Write, Speak

CAREER OBJECTIVE

Aspiring AI & Data Science engineer with a strong foundation in Python, and computer vision, passionate about building real-world, intelligent applications. Experienced in developing AI-powered solutions using Flask, OpenCV, and deep learning frameworks, with a keen interest in Generative AI, data-driven decision-making, and prompt engineering. Eager to contribute analytical thinking and hands-on technical skills to innovative and impactful projects in the IT industry.

AREA OF INTEREST

- Machine Learning & Natural Language Processing
- Computer Vision
- Data Analysis
- Article Reading

PROJECTS

Smart College Information Assistant Using Machine Learning **2024–2025**
Developed an AI-powered chatbot using Python, Flask, and Machine Learning that provides quick responses to academic and administrative queries. Implemented TF-IDF vectorization for intelligent query matching and exposed the model via a Flask REST API, achieving over 90% accuracy on common student queries — improving information accessibility for students and staff.

Virtual Brightness Controller Using Air Gestures **2023–2024**
Built a touchless screen brightness control system using Python, OpenCV, and MediaPipe. Leveraged real-time hand landmark detection to map finger-distance gestures to system brightness levels, enabling a fully hardware-free, gesture-driven user experience.

Face Login System **2023**
Developed a real-time facial recognition system for secure login and automated attendance using Python, OpenCV, and dlib. Used 128-point facial encodings via dlib's face descriptor model to identify and authenticate individuals with high accuracy, reducing manual attendance effort significantly.

EXTRA CURRICULAR ACTIVITIES

Stock Market Investing — actively managing a personal equity portfolio since 2021, with a focus on long-term value investing

CERTIFICATIONS

- Python (Basic) Certificate — HackerRank
- SQL (Basic) Certificate — HackerRank
- Machine Learning (Basic) Certificate — HackerRank

DECLARATION

DHILIP KUMAR S hereby declares that the above-written particulars are true and correct to the best of my knowledge.
